Helix Medical Expands Manufacturing Capabilities

Helix Medical now oversees the operations of APEC, a thermoplastic and silicon injection molding company. APEC utilizes ARBURG and TOYO presses ranging from 28-300 tons, and also offers advanced silicone injection molding with seven silicone LIM cells. They also have the unique ability to manufacture both thermoplastics and silicone in the same Class 100,000 cleanroom. Helix can now offer customers insert and two-shot molding.

Helix Medical, 1110 Mark Ave., Carpinteria, CA 93013.
